Plateau durations follow sigma^-(c-2), c = route depth (log law for c = 2)
plateau duration (gradient-flow time)
B8 {0,1,2}->3: depth c = 2
B8 {0}->1: depth c = 3
B8 {0,1}->2: depth c = 4
PS {1,2}->0: depth c = 5
training, median and quartiles
aligned-manifold reference
prediction log(1/sigma)/(s A)
prediction sigma^-1
prediction sigma^-2
