Corollary 8.6: once 1111111 is learned, 0022111 needs 2 new cores instead of 5:
the escape time drops from eps^-3 to log(1/eps)
J = {0000000}: balanced start (A_bal)
J = {0000000}: Gaussian starts (C), median of 16
eq. 6.16, route depth 5
J = {0000000, 1111111}: balanced start (A_bal)
J = {0000000, 1111111}: Gaussian starts (C), median of 16
eq. 6.16, route depth 2 (log law)
escape time (gradient-flow time units)
