Plateau duration against init scale, one typical event per target: the prediction from the cores that change fails for CP teachers on the chain
Pattern control
binary8, event 3, cores that change = 3
CP, overlap 0.3
mps6, event 2, cores that change = 6
CP, overlap 0.6
mps6, event 2, cores that change = 6
Random TTN
binary8, event 1, cores that change = 3
MNIST
mps16_snake, event 1, cores that change = 2
plateau duration before the event
(gradient-flow time)
init scale sigma
measured
prediction: slope -(cores that change - 2)
